

The Intelligencer.

OFFICE: NO. 15 QUINCY STREET.

FREW, HAGANS & HALL,
Proprietors.

SATURDAY MORNING, APRIL 3.

Farmers' Reading.

We have made arrangements to have reported expressly and regularly for the columns of the Intelligencer, the proceedings of the American Farmer's Club which holds weekly meetings in New York. It will be an interesting and valuable column for our country readers and will be an important feature of our Weekly.

The Cabinet—A Hint at the "Contributors."

It seems probable the second edition of the Cabinet will soon give place to a third—at least in part. The New York *Sun* has information that Mr. Fish, Secretary of State, will soon retire from the State Department and receive the appointment of Minister to England. Can it be that the road to a foreign mission lies only through the State Department? Public opinion is setting in very strongly against the continuance of Mr. Fish, the Secretary of the Navy. The New York *Sun* has a leader putting the case against Mr. Borie very strongly, showing first that he is physically incapacitated for the place. "The condition of his health," says the *Sun*, is such that he cannot read, or think consecutively, or attend to any serious business for an hour at a time without experiencing great pain and suffering. This is the permanent, chronic state of his nervous system. There is no hope of his recovery. Mr. Borie is therefore a mere figurehead, Admiral Porter furnishing the brains for the Department. But the stronger reason is thus forcibly put by the *Sun*:

Along with the regard justly due to truth and fair dealing with the public, there is another consideration which should have formed Mr. Borie—and forbidden him as sternly and unalterably as the voice of Conscience herself—from seeking or accepting either place in the Cabinet, or any other office of power or emolument under General Grant's Administration. He was a pecuniary benefactor of General Grant. He has given the General money. He was a very large contributor toward the purchase of a house in Philadelphia, worth some fifty thousand dollars, which was presented to the General. The present gave proof of Mr. Borie's good feeling, and that of his devotion to the benevolent. We cannot say that it was wrong for the General to receive it at that time, though other persons might have understood it as a gratuity. But any effect of these donations is now too evident to be a subject of serious debate.

Every man who has bestowed such gifts on Gen. Grant is thereby disqualified from holding any office of power or emolument under General Grant's Administration. We don't mean that he is legally disqualified. There is no statute bearing on the subject, because no such law has been thought necessary. But disqualified by the law of personal delicacy, public policy, and a desire to keep the world's opinion clear. Cannot Mr. Borie understand that people will be able to see through his great office, that he has obtained it by gifts of money and other things? Of course, we do not admit for a moment that such is the truth, but we understand that Gen. Grant will believe that he would be benighted by such sordid motives. But Mr. Borie is a man of the world, and cannot stand in any place of honor, and cannot understand from the beginning that he ought not to seek for or to take any such place, because the beneficiaries, if you prefer, the pecuniary relations between himself and the General were such that he could not decorously receive any other office of power or emolument at his hands. It will not do to have the honor of the Presidency and the most important office of the Executive Government soiled and degraded by giving even our enemies the least ground for suspecting them of an allotment of money of pecuniary influence and obligation.

SENATOR SPRAGUE's recent speeches in the Senate have attracted a great deal of attention—not from their ability, for nobody considers Mr. Sprague a heavy weight, although the waggy Nye spoke of his first speech as "the sledge-hammer blows of the Rhode Island Bonapartes"—but for their remarkable arrangement of the two Houses of Congress, and especially the Senate, as corrupt, imbecile and ignorant; and no doubt because there is a general belief that his utterances are inspired by his father-in-law, Chief Justice Chase. In his last speech his accusation of Congress for corruption, imbecility and ignorance, was only less startling than the proofs with which he attempted to sustain the charges. The perfect frankness of the Senator, in connection with these speeches, is the most striking feature connected with them. When one of his statements, concerning the decay of industry and the ruin of the smaller manufacturers, was challenged, he acquiesced in the challenge, but he attained his business prosperity, during the last few years, "only by crushing out all smaller competitors." When he spoke of Congressional corruption, he said he himself knew of a member who had been asked to report upon a certain matter in a certain way, and the temptation held out before him was \$100,000. For this startling charge the Senator should be at once "investigated" by a special committee, and the Senate should at once take steps to clean its skirts. The Senator also charged, in general, that these corrupt influences are to-day riding roughshod over all the industrial interests of this country, while, at the same time, all the members of Congress are glorifying each other's smartness, and declaiming about the country's prosperity.

While there is no doubt Mr. Sprague takes a somewhat jaundiced view of things yet, there is reason to fear there is more truth in a good deal he says than there ought to be. He has manifested a good deal of courage; and the stirring up which he has given Congress will do good.

NEW PAPER.—The first number of the *Hone Visitor* has been laid on our table. It is edited by Mr. W. H. Morton, of Martinsville, Ohio, and is printed by W. J. Johnson & Co., of this city. The *Visitor* proposes to be a temperance, literary and religious paper. It is to be the organ of the order of Good Templars in the State and will advocate its principles, viz: total abstinence, and prohibition of the manufacture, importation and sale of intoxicating liquors. The *Visitor* is a handsome eight page, four-column sheet, well edited and neatly printed. It ought to have a good support, especially from the active advocates of Temperance Reform.

An investigation into the alleged fraudulent issue of bonds to the Central Pacific Railroad Company is going on at Washington before the House Pacific Railroad Committee. Eminent counsel are employed on both sides.

American Institute Farmers' Club.

Reported Specially for the Intelligencer.

NEW YORK, March 30.

The regular weekly session of the American Institute Farmers' Club was held this afternoon, Mr. N. C. Ely, Chairman, and J. W. Chambers, Secretary.

The following communications were read:

WHEN TO ROW CLOVER.

L. D. Ackerman, of Union City, Michigan, inquired of the Club if it would do a special column about the clover in New York. It will be an interesting and valuable column for our country readers and will be an important feature of our Weekly.

The Cabinet—A Hint at the "Contributors."

It seems probable the second edition of the Cabinet will soon give place to a third—at least in part. The New York *Sun* has information that Mr. Fish, Secretary of State, will soon retire from the State Department and receive the appointment of Minister to England. Can it be that the road to a foreign mission lies only through the State Department? Public opinion is setting in very strongly against the continuance of Mr. Fish, the Secretary of the Navy. The New York *Sun* has a leader putting the case against Mr. Borie very strongly, showing first that he is physically incapacitated for the place. "The condition of his health," says the *Sun*, is such that he cannot read, or think consecutively, or attend to any serious business for an hour at a time without experiencing great pain and suffering. This is the permanent, chronic state of his nervous system. There is no hope of his recovery. Mr. Borie is therefore a mere figurehead, Admiral Porter furnishing the brains for the Department. But the stronger reason is thus forcibly put by the *Sun*:

Along with the regard justly due to truth and fair dealing with the public, there is another consideration which should have formed Mr. Borie—and forbidden him as sternly and unalterably as the voice of Conscience herself—from seeking or accepting either place in the Cabinet, or any other office of power or emolument under General Grant's Administration. He was a pecuniary benefactor of General Grant. He has given the General money. He was a very large contributor toward the purchase of a house in Philadelphia, worth some fifty thousand dollars, which was presented to the General. The present gave proof of Mr. Borie's good feeling, and that of his devotion to the benevolent. We cannot say that it was wrong for the General to receive it at that time, though other persons might have understood it as a gratuity. But any effect of these donations is now too evident to be a subject of serious debate.

Every man who has bestowed such gifts on Gen. Grant is thereby disqualified from holding any office of power or emolument under General Grant's Administration. We don't mean that he is legally disqualified. There is no statute bearing on the subject, because no such law has been thought necessary. But disqualified by the law of personal delicacy, public policy, and a desire to keep the world's opinion clear. Cannot Mr. Borie understand that people will be able to see through his great office, that he has obtained it by gifts of money and other things? Of course, we do not admit for a moment that such is the truth, but we understand that Gen. Grant will believe that he would be benighted by such sordid motives. But Mr. Borie is a man of the world, and cannot stand in any place of honor, and cannot understand from the beginning that he ought not to seek for or to take any such place, because the beneficiaries, if you prefer, the pecuniary relations between himself and the General were such that he could not decorously receive any other office of power or emolument at his hands. It will not do to have the honor of the Presidency and the most important office of the Executive Government soiled and degraded by giving even our enemies the least ground for suspecting them of an allotment of money of pecuniary influence and obligation.

SENATOR SPRAGUE's recent speeches in the Senate have attracted a great deal of attention—not from their ability, for nobody considers Mr. Sprague a heavy weight, although the waggy Nye spoke of his first speech as "the sledge-hammer blows of the Rhode Island Bonapartes"—but for their remarkable arrangement of the two Houses of Congress, and especially the Senate, as corrupt, imbecile and ignorant; and no doubt because there is a general belief that his utterances are inspired by his father-in-law, Chief Justice Chase. In his last speech his accusation of Congress for corruption, imbecility and ignorance, was only less startling than the proofs with which he attempted to sustain the charges. The perfect frankness of the Senator, in connection with these speeches, is the most striking feature connected with them. When one of his statements, concerning the decay of industry and the ruin of the smaller manufacturers, was challenged, he acquiesced in the challenge, but he attained his business prosperity, during the last few years, "only by crushing out all smaller competitors." his had rid his trees of the borer by driving nails into them. The oxide of iron gets into the sap and the borer does not fancy it.

Dr. Trimmer said that could not be. There was no science in the statement. Mr. Carpenter said another way to prevent the ravages of the borer, was to use a clove of strong paper or cloth smeared with grafting wax around the trunk close to the ground.

The Club then adjourned.

Witchcraft in New Jersey.

Samuel Thompson, half Indian, half negro, known as the Indian root doctor, died in the Newark Court of Sessions yesterday for practicing witchcraft upon a negro named Cesar Kemfens. The story is a very curious one. The negro was an industrious man, but seems to be overstocked with credulity, and Thompson easily gained almost unlimited control over him. He first informed him that within a circle of fifty miles of Newark the ground was filled with roots or herbs which would drive away evil spirits. Thompson then informed him that he had a powerful medicine which would drive away evil spirits, and that he would give him a trial. Thompson then informed him that he had a powerful medicine which would drive away evil spirits, and that he would give him a trial.

Mr. Horace B. Hitchcock, of Hillsdale, Michigan, wrote to inform the club that he keeps the curculion from spoiling the choice fruit by dusting it with a fine powder of plaster of Paris.

THE VALUE OF COAL ASHES.

An interesting discussion then took place on the subject of the following question: "What is the value of coal ashes?" Mr. A. S. Todd recommended the application of 1,000 one-horse loads of coal ashes to the acre, meaning the coal ashes have so little value as manure.

Mr. A. S. Todd differed with him. He thought that coal ashes were worth from three to four dollars a ton. He liked their effect on sandy soil. Mr. P. F. Quinn said he used coal ashes on his farm, and that he liked their effect on sandy soil. He liked their effect on sandy soil. He liked their effect on sandy soil.

Mr. Bruen said he had used the coal ashes on his farm, and that he liked their effect on sandy soil. He liked their effect on sandy soil. He liked their effect on sandy soil.

ABOUT 40 clerks were discharged from the Treasury Department Thursday.

DIED.—On Friday morning, 2nd of April, at 6 o'clock, Edw. G. a son of Samuel C. and Maggie J. Kusley, aged 1 month and 10 days.

FUNERAL will take place from the residence of the parents on Quincy street, at 2 o'clock, this, 3rd of April, 1893. Friends of the family respectfully invited to attend.

Special Notices.

VICTORY.

A CONQUEST INSTANT AND SUBLIME. Over spirit Nature and over galling Time! In the hour of our darkest hour, we assume a Black or Brown that charms the eye.

CRISTADORO'S HAIR PRESERVATIVE. AND BEAUTIFIER.—This famous preparation is guaranteed to preserve the hair in its natural beauty and luxuriance throughout life. If the hair is thin, it thickens it; if dull and dead-looking, it gives it a magnificent gloss. It is warranted to remove scurf and dandruff, prevent a bald head, and restore it in bald spots, cause it to curl, and keep it in splendid order under all circumstances, and in all climates.

SOLD BY DRUGGISTS, and applied by all Hair Dressers. Beware of cheap imitations. State and National Patent No. 86,500. Sole Importers, J. M. & Co., 601 Broadway, N. Y.

ALCOCK POROUS PLASTER.

Rheumatism, Lumbago, Cold Feet, Pain of the Chest, the Side, Bruises and eczema, especially of the limbs and joints, and a backache, which will not set.

2d. In the Dorking he will get fine delicate flesh, a full development of the muscles, and a self help, and the ability to pick up a living where any hen can live—but he is not great.

3d. In the Chinese fowls, especially the Brahmas, light and dark, he finds a big-boned chicken, a rapid grower, in large and small quantities, and a good weight of poultry meat to the food consumed.

4th. In the French breeds, Le Fleche and Houdan, we have fowls that lay well at all times of the year and whose flesh is excellent. They are not inclined to set, and make poor mothers.

We recommend to all who keep poultry to improve the same by the introduction of cocks of some of the improved varieties. If he wishes to breed mainly for poultry, he should select Dorking, Game, or a cross to Brahmas hens. If in eggs there is more profit, let him get a Houdan or a Leghorn cock. The Black Spanish is a good layer, but not so remarkable in that respect as a Leghorn, and his flesh is usually dry and hard.

5th. In the French breeds, Le Fleche and Houdan, we have fowls that lay well at all times of the year and whose flesh is excellent. They are not inclined to set, and make poor mothers.

6th. In the French breeds, Le Fleche and Houdan, we have fowls that lay well at all times of the year and whose flesh is excellent. They are not inclined to set, and make poor mothers.

Special Notices.

1802. 1847. 1868.

In 1802 the grandfather of Dr. Tobias introduced the Venetian Liniment into the United States. It was a success, and the price was a guinea a bottle. His late Majesty, William IV., used it for Chronic Rheumatism, and was entirely cured after suffering for two years, his attending physician being unable to effect a cure. He wrote a letter of thanks, which is now in possession of my uncle, in Liverpool. I have offered £100 sterling for the letter, but it was refused. In 1871 put it out in the United States. In 1881, in 1883 the sale is immense. Thousands of families are never without it. It is safe and innocent to apply externally, and to take internally. For twenty-one years I have warranted it to cure the following complaints: Cholera, Diarrhea, Dysentery, Croup, Colic, Cramps, Vomiting and Sea-sickness, taken internally; and Chronic Rheumatism, Burns, Cuts, Bruises, Old Sores, Tooth-ache, Frost-bite, Swellings, Insect Stings, and Pains in Chest, Back and Limbs, externally. It never fails, if used as directed. For Cholera and Dysentery it is certain, if used when first attacked. No one can try it without being cured. It is sold by the Druggists, Price, 50 cents and one dollar. Depot, 10 Park Place, N. Y.

DARBY'S PROPHYLACTIC FLUID.

A CHALLENGE TO THE WORLD!

We challenge the world to produce a better or a stronger recommendation for any article for any purpose than the following:

NOVEMBER 1st, 1888.

We very cheerfully unite our testimony with the above, and we are not alone. We are joined by the most eminent physicians and scientists of the day. We are joined by the most eminent physicians and scientists of the day. We are joined by the most eminent physicians and scientists of the day.
